CONTROL

The Industry's Most Intelligent, Versatile & Expandable Aquarium Assistant

CORALVUEHYDROS.com

Your Artificially Intelligent Aquarium Assistant

Use the **CoralVue HYDROS** to control and monitor aquarium devices from your computer, smartphone or tablet. The user-friendly interface allows you to easily monitor your aquarium's temperature, ORP, pH, alkalinity levels and more. With just one tap, you can control your ATO, lights, heaters, pumps, skimmer, RO/DI units, etc.

Set up is quick and easy.

With 13 different preset configurations, it will take only minutes to get all of your equipment set up and running with no programming required.

CONTROL²

This small, general-purpose device capable of performing all the main functions for your saltwater or freshwater tank.

2 DRIVE PORTS

2 SENSE PORTS

8 WiFi DEVICES

CONTROL⁴

A larger, more powerful device with all the capabilities of the HYDROS Control 2 plus additional ports to monitor, control, and power equipment.

2 DRIVE PORTS

4 SENSE PORTS

8 WiFi DEVICES

2 PROBE PORTS

Probes are only as good as their signal. The Control 4 ensures your readings will be accurate & reliable.

0-10V I/O PORTS

Send & receive commands from other devices including variable speed pumps, push-buttons, float switches, plus much more.

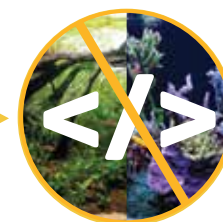

SYSTEM SMART NET

Use any HYDROS device by itself or as part of a larger system with NO single point of failure.

PLUGS IN & STAYS IN

IP-rated GX12 connectors securely screw in to protect against disconnecting, dust, and moisture.

SIMPLE SETUP

Control & monitor via mobile device, iOS & Android.* Absolutely NO CODING necessary!

CLOUD-BASED

HYDROS is a cloud-based app that gives you a command center for your aquarium(s) from anywhere in the world.

MADE IN USA

HYDROS is engineered, assembled and supported at CoralVue headquarters in Slidell, Louisiana.
