

INSTRUCTION

1. Hang on the back of the Aquarium, adjust the base screw bracket; be sure of hanging on the back stably
2. Pour in enough water into the skimmer, connect the air hose to the valve. Start the pump of skimmer, then the siphon of the Overflow System begins to work. At the same time, Take away the Air hose from the valve, and connect it to silencer.
3. Skimmer water level can be adjusted by lifting and lowering the collection cup.
