Easysps

Elevating SPS Coral Growth and Color

For the dedicated reef hobbyist, nothing compares to the challenge and reward of keeping SPS corals. Their vibrant colors and intricate growth patterns are a true display to a healthy, balanced reef. Easysps is a revolutionary feed designed specifically for these demanding corals, providing the precise nutrition they need to thrive. Our formula combines the highest quality, naturally sourced ingredients with a unique blend optimized for superior color and robust growth.

RESEARCH & DEVELOPMENT | NATURAL INGREDIENTS | FREEZE DRIED | HIGH DIGESTIBILITY | EU MADE IN EUROPE

Why Freeze-dried?

Unlike traditional heat-processed foods that strip away vital nutrients, our freeze-drying method locks in the raw, natural goodness of our ingredients. This means your fish receive a diet that is as close to their natural food source as possible, maximizing nutritional value and flavor.

The Power of Our Ingredients:
Pure, Potent, and Complete

- The nutritional composition of Easysps boosts corals with high nutritional value proteins, natural lipid profile rich in EPA, ARA and DHA, carbohydrates and functional micronutrients involved in the metabolic system of these animals.
- Our zooplankton species is rich in glutamine that triggers a quick response from corals.
- Thanks to its composition, the corals are nourished in a complete and balanced way, and hence, improving their coloration by not depending mainly on the zooxanthellae for their feeding.
- Easysps will enhance the bright and intense colors of your corals. It will also help strengthening and growing SPS corals healthy.
- The size of Easysps particles ranges from 0.2 - 400 microns making it ideal to facilitate the capture by the SPS polyps.
- We strongly recommend to use Easysps in conjunction with Easybooster to prevent any possible nutrient limitations and support the natural balance of the system.

Visible Results:

Unmatched Vibrancy and Performance

- Easysps is designed for those who want to see a tangible difference in their SPS corals. Our formula's natural palatability and rich nutrient profile are a result of our uncompromising dedication to ingredient quality.
- Promotes Natural Feeding: The combination of natural ingredients triggers a strong feeding response from your SPS polyps, ensuring they receive the nutrition they need.
- Encourages Growth: The optimal balance of protein, lipids and essential fatty acids promotes accelerated growth and robust skeletal structure.
- Enhances Coloration: The presence of specific pigments like fucoxanthin naturally deepens and intensifies the vibrant colors of your SPS corals, making their colors show like never before.
- Sustains Health: The complete nutritional profile strengthens your corals' natural defenses, helping them better resist stress and disease.

Specifications

Sizes	40 g / 650 g
Diameters	0.2 - 400 microns
Ingredients	Aquatic invertebrates, fish oil and microalgae (Isochrysis galbana, Tetraselmis chuii and Phaeodactylum tricornutum).
Analytical constituents	Protein (59.03%), Fat (9.10%), Ash (15.81%) and Fiber (6.90%). Energy: 1388 kJ / 332 kcal/100 g.
