EasyLPS

Fueling the Flow: Nutrition for Optimal LPS Corals

LPS corals represent a unique blend of elegance and resilience. Their graceful polyps and stunning fluorescence are the mark of a well-cared-for reef. EasyLPS is a next-generation coral feed designed to meet the specific nutritional needs of these captivating corals, promoting incredible polyp extension, enhanced color and robust health.

RESEARCH & DEVELOPMENT | NATURAL INGREDIENTS | FREEZE DRIED | HIGH DIGESTIBILITY | EU MADE IN EUROPE

Why Freeze-dried?

Unlike traditional heat-processed foods that strip away vital nutrients, our freeze-drying method locks in the raw, natural goodness of our ingredients. This means your fish receive a diet that is as close to their natural food source as possible, maximizing nutritional value and flavor.

The Power of Our Ingredients:
Rich, Bioavailable and Optimized

At the core of EasyLPS is a firm dedication to quality and coral-specific nutrition. We've meticulously crafted a formula that combines the benefits of a diverse microalgae blend with premium, nutrient-rich aquatic invertebrates. This isn't just a feed; it's a complete nutritional solution designed to boost the full potential of your LPS corals.

- **Promotes Natural Feeding:** The combination of natural ingredients triggers a strong feeding response from your LPS polyps, encouraging them to fully extend and capture the nutrition they need.
- **Enhances Polyp Extension:** The bioavailable proteins and lipids promote the plumpness and extension of polyps, giving your corals a full and healthy appearance.
- **Boosts Fluorescence and Color:** The presence of specific pigments like fucoxanthin naturally deepens and intensifies the vibrant hues and fluorescence of your LPS corals, making their colors truly stand out like never before.
- **Sustains Health:** The complete nutritional profile strengthens your corals' natural defenses, helping them better resist stress and disease.

The EasyLPS Difference:

Visible Results You Can See

- **Encourages Feeding:** Our blend triggers a natural feeding response, ensuring your corals get the nutrition they need.
- **Maximizes Growth and Extension:** The high-quality proteins and lipids in our feed support exceptional polyp extension and robust tissue growth.
- **Deepens Coloration:** Specific pigments naturally enhance the vibrant hues of your corals, showcasing their full spectrum of color.
- **Builds Resilience:** Our complete nutritional profile strengthens your corals' defenses, helping them resist stress and disease.

Specifications

Sizes	40 g / 70 g / 650 g
Diameter	800 µm
Ingredients	Aquatic invertebrates, glycerin, fish oil and microalgae (Isochrysis galbana, Tetraselmis chuii and Phaeodactylum tricornutum).
Analytical constituents	Protein (63.73%), Fat (8.00%), Ash (16.13%) and Crude Fiber (4.30%). Energy: 1404 kJ / 336 kcal/100 g.
